Precision Cardiovascular Risk Intelligence Platform / Dashboard

SCENARIOActive scenario: Healthy — BaselineLow RiskUpload ReportMon, Oct 05 · 19:17

RISK SUMMARY

Low Risk

Current cardiovascular risk indicators are generally within the low-risk range.

HEART RATE (HR)

68 BPM

Normal Sinus Rhythm (NSR)

BLOOD PRESSURE (BP)

117/78 mmHg

Normal / Healthy BP (Healthy)

HEART RATE VARIABILITY (RMSSD)

70 ms

Healthy

CORONARY ARTERY DISEASE (CAD) RISK SCORE

19

LOW RISK

Confidence: 100%

WHAT THIS MEANS

Based on the current simulator inputs, the calculated score falls within the Low Risk category. Current cardiovascular risk indicators are generally within the normal range.

0–20Very Low

21–40Low

41–60Moderate

61–80High

81–100Critical

DISEASE-SPECIFIC RISK

Atherosclerosis30Watch

Myocardial Ischemia0Healthy

Arrhythmia0Healthy

Hypertensive Heart Disease5Healthy

Heart Failure4Healthy

Sub-scores are weighted composites from existing sensor parameters. FAI and CAC, when entered, contribute to Atherosclerosis risk only. Not individually clinically validated — research simulator.

FAT ATTENUATION INDEX (FAI)

-82.0 HU

Normal - Low inflammation

Threshold cutoff

Provenance

Manual entry

Normal

-70.1 HU

CT-derived · not sensor estimated

CORONARY ARTERY CALCIUM SCORE (CAC)

0 AU

None - Very low risk (<5%)

High-risk threshold

Provenance

Manual entry

None

> 400 AU

CT-derived · not sensor estimated

7-DAY CARDIOVASCULAR RISK TREND

19 Low

Insufficient historical data

Risk trend will appear as simulation history is collected.

CARDIAC READOUTS

BLOOD PRESSURE (BP)

117/78 mmHg

HEALTHY

HEART RATE (HR)

68 BPM

NORMAL SINUS RHYTHM (NSR)

CORRECTED QT INTERVAL (QTc)

421 ms

NORMAL

ST SEGMENT

0.09 mV

ISOELECTRIC (NORMAL)

PULSE TRANSIT TIME (PTT)

228 ms

BLOOD OXYGEN SATURATION (SpO2)

98%

Upper Dashboard Overview — Healthy Baseline State

Live snapshot of the platform under the active **Healthy — Baseline** scenario. The top stat row displays normal resting hemodynamics (Blood Pressure 117/78 mmHg, Heart Rate 68 BPM) and healthy autonomic modulation (HRV RMSSD 70 ms). Imaging biomarker cards report low pericoronary inflammation (FAI -82.0 HU) and zero calcification (CAC 0 AU). The primary CAD Risk Gauge registers **19 (Low Risk)** with 100% confidence, accompanied by the corresponding clinical explanation band.

PRIMARY CAD RISK SCORE

19 / 100

Band: Low Risk (0–20 Tier)

BLOOD PRESSURE (BP)

117 / 78 mmHg

Normal / Healthy BP

HEART RATE (HR)

68 BPM

Normal Sinus Rhythm

IMAGING BIOMARKERS

FAI -82 HU · CAC 0 AU

Normal Perivascular Fat

Lower Dashboard Overview — Longitudinal Trend, Hemodynamics & Neural Network Analysis

Snapshot of the lower dashboard content scrolled into view. The **7-Day Cardiovascular Risk Trend** tracks multi-day score stability at 19 (Low). Below the trend, **Cardiac Readouts** confirm normal hemodynamics (QTc 421 ms, ST segment isoelectric, PTT 228 ms, SpO2 98%) alongside the **Lab Summary** panel. Positioned below readouts, the **EchoNext 1D ResNet-34** in-app deep learning classifier confirms NORM rhythm morphology with a minimal Structural Heart Disease (SHD) Index of 5%. The right panel details sub-scores and the factor contributions donut breakdown.
